Title : Cyber Crime: The Threat of Cyber World

Abstract

The topic that we are interested to discuss and focus on our technical writing is involved with the term “Cyber Crime”. This term is quite familiar in the era of this digital world and modern technology. Cybercrime is defined as a crime in which a computer is the object of the crime (hacking, phishing, spamming) or is used as a tool to commit an offense (child pornography, hate crimes). Cybercriminals may use computer technology to access personal information, business trade secrets or use the internet for exploitative or malicious purposes. Criminals can also use computers for communication and document or data storage. Criminals who perform these illegal activities are often referred to as hackers. Cybercrime may also be referred to as computer crime. Just like in the real world, we face criminals who do many types of mischiefs, unethical activities. Similarly, Virtual or Cyber world has also these type of criminals. They are known as Cyber Criminal. Like the real life criminal, cyber-criminals are also as dangerous as them. However there are a lot of cyber-crimes that can hamper our real life activities and ruin the normal flow of our daily life-style. Cyber crimes also have a lot of variety as the mindset and psychological behavior of each criminals aren't same. Like to be specific, there are – **Unethical Hacking, Cyber Bullying, Online Money Theft, Credit Card fraud, Spamming, Scamming, creating and spreading malware, virus, ransomware, adware, malicious software, Data Theft**, and many more and more crimes that can make any internet users becoming the victim of cyber crime.
